SUMMARY

Product Manager with 7+ years of experience across product management, technical delivery, and enterprise B2B FinTech SaaS. Experienced in building Accounts Receivable and Collections solutions, including Salesforce integrations, automated correspondence workflows, and payment commitment strategies for enterprise clients. Strong technical foundation with expertise in Agile, enterprise integrations, and leveraging AI and LLM-powered tools to accelerate product workflows and operational efficiency.

SKILLS AND TOOLS

- **Product Management:** Product Strategy, Roadmap Management, Backlog Prioritization, Agile & Scrum, Stakeholder Management, Market Research, UX, and Data Analysis
- **Technical & Analytics:** SQL, Java, Workflow Automation (n8n), Supabase, and Pendo
- **AI & Productivity Tools:** ChatGPT, Claude, Gemini, NotebookLM, Napkin AI, Stitch, and Prompt Engineering
- **Development & Collaboration Tools**: GitHub, Visual Studio Code, Jira, Confluence, and Figma

EXPERIENCE

Associate Product Manager | HighRadius — Jun '23 - Jul '26

- Collaborated closely with cross-functional engineering, design, and operations teams to centralize Salesforce collections integrations, reviewed user interfaces, customer journeys, and edge cases to reduce onboarding ambiguity.
- Led product discovery to execution for **automated payment commitment workflows** from conducting qualitative analysis of customer feedback to map user personas and customer journey maps.
- Developed an AI-powered template translation feature that eliminated manual translation effort, enabled **faster implementation**, and ensured **automatic propagation** of updates.
- Exercised roadmap ownership and conducted competitive analysis to align **promise to pay** feature offerings with the **competitive landscape**.
- Optimized document attachment workflows by **50% in email workflows**, prioritizing platform stability and user experience.
- Groomed the product backlog and participated in PI Planning cycles, translating market signals and customer feedback into prioritised epics and initiatives.
- Owned end-to-end delivery of Draft Correspondence feature leveraging **rapid prototyping** and driving positive user behavior change that resulted in a 5% reduction in support tickets and a **4% FTE** savings across 20+ clients
- Reduced overall support tickets by **~5%** through the **Pause and Resum**e self-serve feature for Auto Correspondence.
- Influenced roadmap direction and NPS scores by evaluating and addressing the top **25%** of client feature requests.
- Defined, prioritized, and executed the product roadmap by reviewing and evaluating **300+** product feature requests.
- Collaborated closely with engineering and design teams to deliver high-impact features on time while maintaining a sharp focus on **UX and business goals**.

Senior Quality Analyst | HighRadius — Oct '18 - May '23

- Collaborated across platform ecosystems to set up SES for all environments, reducing implementation time from **2 days to 1 hour**.
- Led the QA team through **sprint planning**, establishing a clear 'definition of done' to ensure alignment across all phases of the **Agile development environment**.
- Built reusable FAQ documentation accelerating consulting speed and reducing resolution turnaround time.
- Ensured platform stability and **delivery quality** by participating in **defect triage** and automating manual test cases
- Contributed **90% of the product playbook** created to help the onboard new team members.
